2. Next, we need to gather information. This includes researching the problem, identifying stakeholders, and understanding the context.

3. Once we have gathered information, we can start to develop a solution. This involves brainstorming ideas, evaluating options, and selecting the best one.

4. After we have selected a solution, we need to implement it. This involves creating a plan, assigning tasks, and monitoring progress.

5. Finally, we need to evaluate the results. This involves comparing the actual outcomes with the expected ones and identifying any areas for improvement.
